I. DEVELOPMENT AND REVIEW OF THE STANDARDS

A. Mechanism for Review of the Standards

Specialized Professional Associations (SPAs) must identify mechanisms for the preparation or review of program standards.

B. TESOL’s Process in Developing the Standards

TESOL’s mission is to develop the expertise of its members and others involved in teaching English to speakers of other languages to help them foster effective communication in diverse settings while respecting individuals’ language rights. To this end:

- TESOL articulates and advances standards for professional preparation and employment, continuing education, and student programs.
- TESOL links groups worldwide to enhance communication among language specialists.
- TESOL produces high-quality programs, services, and products.
- TESOL promotes advocacy to further the profession.

In October 1999, the TESOL Board of Directors (BD) appointed a task force to develop standards for P–12 ESL teacher education programs across the nation. The members of the task force at that time were

- Lydia Stack, Bilingual Education and Language Academy, California, Chair
- Mary Lou McCloskey, Georgia State University
- Keith Buchanan, Fairfax County Public Schools, Virginia
- Eric Dwyer, Florida International University
- Candace Harper, University of Florida
- Ana Huerta-Macias, New Mexico State University
- Cheryl Huffman, C. L. Huffman & Associates, Oklahoma
- Natalie Kuhlman, San Diego State University, California
- Beth Witt, Chinle Elementary School, Arizona
- Molly Kirby, TESOL Central Office, Virginia, ex officio; Jason Majesky assumed this position in 2001

Special thanks to Nancy Cloud and Denise Murray for their continued support and efforts in the development of these standards.

Task force members represent

- geographic areas with large and small immigrant populations
- expertise in university teacher education programs
- expertise in elementary and secondary preservice and in-service professional development for ESL and content-area teachers
- expertise in managing P–12 ESL programs
- expertise in developing and monitoring standards
- knowledge of several states’ certification requirements
- expertise in bilingual education
- expertise in Native American education
- expertise in cross-cultural education

Upon approval by the TESOL BD and the National Council for the Accreditation of Teacher Education (NCATE), these standards will be used in NCATE’s accreditation of P–12 ESL teacher education programs at colleges and universities that apply for such status.

**Time Line of Significant Steps in the Process of Developing the Standards**

October 1999  The task force held its initial meeting. Boyce Williams and Emerson Elliott addressed the team, which then discussed the background reading for the meeting and established content areas (domains) for the document. The team adopted NCATE’s elementary standards as its model. Members also discussed how these standards would fit with principles outlined by the Interstate New Teacher Assessment and Support Consortium, standards established by the National Board for Professional Teaching Standards, the report of the National Commission on Teaching and America’s Future, TESOL’s (1997) *ESL Standards for Pre-K–12 Students*, and the Australian minimum skills competencies for LOTE (Language Other Than English) Teaching (from Griffith University, Queensland, Australia).

January 2000  A survey conducted at a TESOL teacher training session confirmed that the content areas for the standards document were appropriate and comprehensive.

March 2000  At the TESOL 34th Annual Convention, in Vancouver, Canada, the full task force shared the first draft of three of the five domains.

April 2000  A first draft of the standards for Domains 1–5 was presented at the 31st Annual California/Nevada (CATESOL) State Conference, in Sacramento, California USA. Ten participants shared their feedback on the draft.

June 2000  The task force’s plan was described in *TESOL Matters* (June/July 2000, Vol. 10, No. 2, pp. 5, 9), the association newsletter sent to all TESOL members. The article also indicated that drafts would be posted on-line on TESOL’s Web site and that feedback was welcome.

The task force met to refine drafts of Domains 1–3 and to review first drafts of Domains 4 and 5 as a full team.

October 2000  Task force members prepared a full draft for posting on TESOL’s Web site.

November 2000  Eric Dwyer, Candace Harper, and Mary Lou McCloskey, task force representatives, held a meeting at the Southeast Regional TESOL Conference in Miami, Florida, to solicit additional feedback from professionals to further refine drafts of Domains 1–5.

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
January 2001  The first draft was posted on TESOL’s Web site, and 1,307 colleagues were specifically notified of the posting.

February 2001  The task force met at the TESOL 35th Annual Convention in St. Louis, Missouri USA, to consider feedback from the Web and hard-copy versions of the first draft and to discuss the draft at an open meeting. Thirty-five TESOL members attended this open meeting.

April 2001  Lydia Stack and Natalie Kuhlman presented the draft standards at a session at the 32nd Annual CATESOL State Conference, in Ontario, California. Ten people attended the session and gave feedback.

May 2001  The second draft was posted on TESOL’s Web site. The same groups were notified and encouraged to comment.

Candace Harper presented the second draft at the 25th Annual Sunshine State Conference, in St. Petersburg, Florida, to obtain input from affiliate members on the domains and performance standards.

Natalie Kuhlman, task force representative, held a session at the North Dakota Department of Education.

Molly Kirby, TESOL’s member groups coordinator (MGC) and liaison to the task force, retired, and Jason Majesky was hired as the new MGC liaison to the task force and P–12 program review coordinator.

June 2001  The task force met in Chinle, Arizona, for 4 days to consider feedback on the second draft and to draft all segments of the document for the NCATE Specialty Areas Studies Board (SASB).

The TESOL BD expanded the task force’s charge to include development of guidance to institutions documents and training for program reviewers.

October 2001  NCATE and TESOL BD reviewed and approved the final draft of the TESOL/NCATE Standards for the Accreditation of Initial Programs in P–12 ESL Teacher Education. The task force met at TESOL Central Office to begin writing the institutional training documents.

April 2002  The task force presented the final draft of the TESOL/NCATE Standards for the Accreditation of Initial Programs in P–12 ESL Teacher Education at the TESOL 36th Annual Convention in Salt Lake City, Utah USA. The task force also held a workshop at the convention to train NCATE program reviewers.

C. Using Research and Practice Knowledge Base to Develop the Standards

TESOL must present evidence to show how its standards were reviewed and revised, drawing on research, practice, and feedback to obtain consensus. This process must
include input from practitioners, higher education faculty, state education agencies, and other groups as appropriate.

D. Evidence of Research, Input, and Consensus

1. Modes of Presenting and Reviewing the Draft Standards

TESOL invited input on the standards at every step of the development process.

**TESOL Affiliate Conferences**—During 1999–2001, task force members presented their work in progress in small-group and individual sessions at numerous affiliate conferences in Alabama, California, Florida, Georgia, Michigan, Nevada, North Dakota, Tennessee, Texas, and Virginia.

**TESOL Annual Conventions**—Open meetings were held at the TESOL 34th Annual Convention in Vancouver, Canada, and the TESOL 35th Annual Convention in St. Louis, Missouri USA.

**TESOL Matters**—A description of the task force’s charge and identification of the five possible domains were published in the June/July 2000 issue of *TESOL Matters* (Vol. 10, No. 2, pp. 5, 9). In the article, TESOL members were encouraged to comment on the five domains selected by the task force and to visit TESOL’s Web site to review and offer feedback on draft documents.

**TESOL Web Site**—The first draft of the standards section was posted on TESOL’s Web site in January 2001 for member feedback. The second draft was posted in May 2001.

**Targeted Solicitations**—Specific groups comprising more than 3,700 experts were solicited for their feedback:

- NCATE Specialized Professional Associations (SPAs)
- NCATE state contacts
- TESOL Board of Directors and past presidents
- TESOL interest sections on Elementary Education, Secondary Education, Bilingual Education, and Teacher Education
- TESOL representative on NCATE’s SASB
- TESOL reviewers on NCATE’s Board of Examiners
- TESOL U.S. affiliate leaders
- National Association for Bilingual Education (NABE)
- Educational Testing Service
- others

**Survey**—In April 2001, a survey was conducted among affiliate members at the 32nd Annual CATESOL State Conference in Ontario, California USA, to determine whether the five domains were comprehensive and relevant.
II. Theoretical Framework

A growing number of elementary and secondary schools in the United States are charged with
the education of students from linguistically and culturally diverse backgrounds, many of whom
speak no or limited English; these students are referred to as ESOL students in the remainder of
this document. According to the U.S. Department of Education and a study performed by The
George Washington University, in conjunction with the National Clearinghouse for Bilingual
Education Center for the Study of Language and Education, the number of ESOL students
increased by 69% in the 1990s, and the number of ESOL students is projected to grow to 104.3%
by 2002. Whereas previously the vast majority of these students attended urban schools, more
and more are now attending schools in suburban and rural settings, thus becoming the
responsibility of educators in all regions of the country. The future of these students when they
leave school and, arguably, the very future of the nation, depends on how successful schools are
in meeting the language and cultural needs of this population. The ultimate success of this
challenge depends, in turn, on how effectively teacher education programs are in preparing new
teachers to educate these students. It is this challenge that underlies the standards outlined in this
document.

The following sections present a selective review of current research and theory that provide the
rationale for the teacher education program standards. Considerations of language, culture,
and assessment in the development of the ESL teacher education standards domains are treated
separately, although it must be acknowledged that any separation of these domains is somewhat
arbitrary. Pedagogical considerations are discussed in connection with language, culture, and
assessment, and are not treated separately. It is the convergence of these four domains that create
professionalism, the sum total of the others.

Considerations of Language and Language Learning

During the past 15 years, research findings and theories developed from those findings have
given rise to a significant shift in thinking about the nature of language and language learning
and its relationship to academic achievement. These new research-based insights about the
nature of language and language learning are fundamental to ESL teacher education. All too
often, educational programs for ESOL students in the past focused on teaching language to the
exclusion of other aspects of students’ development (Genesee, 1993). And yet research on first
and second language acquisition during the last two decades indicates decisively that effective
language learning does not take place in isolation from other aspects of children's/students’
development (Cummins, 1994; Wells, 1986). Rather, it is intimately linked with, constrained by,
and contributes to their cognitive and social development. Effective teacher education programs
must provide the background that will help new teachers to understand and appreciate these
numerous and, at times, complex interrelationships.

With specific reference to language and academic achievement, it is no longer believed that
language learning and, therefore, language instruction are effective if they occur in isolation of
the academic curriculum. As a result of extensive research on language learning in foreign
language immersion programs for English-speaking majority group students (Genesee, 1987), it
is now generally recognized that second languages (L2s) are acquired most effectively when they
are learned and taught in conjunction with meaningful academic content. Meaningful content
provides a motivation for language learning that goes beyond language itself.
Certainly, few school-aged children are interested in learning language for its own sake. Integrating language learning with meaningful and interesting academic content also provides a substantive basis for language learning. In other words, nonlinguistic content provides cognitive hangers on which new language structures and skills can be hung. Similarly, authentic communication around academic content provides a real context for learning communicative functions of the new language. In the absence of such authentic communication, language can only be learned as an abstraction devoid of conceptual and communicative substance. The interdependence between language and academic development becomes increasingly important in the higher grades as the mastery of advanced-level academic skills and knowledge becomes increasingly dependent on advanced-level academic language skills.

There is a growing appreciation, again based on research findings, that language is not monolithic and that language proficiency is not unidimensional (Heath, 1986). Researchers who study language in context emphasize that there is considerable variation in the formal and functional characteristics of language from one context of use to another (Cummins, 1994). What constitutes appropriate and effective language use depends on the particular situation. This is equally true within school itself. The language skills that students need for social interaction with their peers and teachers in class and in school at large are different from the language skills needed to function effectively during formal instructional periods. Moreover, it is now widely believed that language form and function vary even across academic domains so that different language skills are needed in a mathematics classroom in comparison to a science or history classroom (Crandall, 1987). The differences include not only specialized vocabulary but also grammatical, discourse, and pragmatic skills that are essential for mastery of and communication about academic subjects. Indeed, the National Council of Mathematics Teachers refers to mathematics as a form of communication. This means that knowing how to use language in one context does not necessarily mean knowing how to use it effectively in another.

These insights about language and language learning have important implications for teacher preparation. ESL (and ideally classroom) teachers charged with the education of ESOL students must understand language as a system of communication, the ways in which it varies as a function of social and academic domains and purposes, and how to plan instruction that will permit ESOL students to learn critical language variations. It also means that ESL teacher candidates must know how to select and use meaningful content as a basis for planning and providing ESL instruction. Planning that incorporates the ESL skills that ESOL students need for dealing with instruction in specific academic domains is a way of respecting the specificity of functional language use as well as a way of ensuring that the language skills taught to ESOL students are useful. If language skills are taught in isolation of the rest of the curriculum, they will not transfer or be useful for coping with academic instruction. Consequently, ESOL students will not benefit fully from academic instruction in their other classes. Teacher candidates must understand the links between academic content and language and how to promote the acquisition of academic language proficiency.

Research also indicates that learning a language (first or second) involves more than learning a linguistic code to label the physical world or to refer to abstract concepts. It entails learning how to use the code in socially appropriate and effective ways (Hymes, 1971; Labov, 1969). Anyone who has learned a second or foreign language as an adult and has tried to use it with native speakers will appreciate that it is not enough to know the words and grammar of the language—you must also know how to use them in socially acceptable ways. This is a complex task. In addition, the specific values, beliefs and relationships that comprise the social life of the group...
whose language the child is learning shape the patterns of language usage in that community in complex and important ways (Phillips, 1983; Schieffelin & Ochs, 1986). Thus, it is through the process of learning a language that is embedded in the social life of a community that children learn the values, beliefs, and ways of interacting in that community and, in turn, become members in good standing in that social group. In other words, in learning a language, the developing child becomes a fully functioning and valued member of the community of speakers of that language.

This is equally true for students learning a new language in school. It is now generally accepted that schools socialize students to the values, beliefs, and goals of the dominant culture. Research shows that this is accomplished to a large extent through the patterns of communication and interaction that characterize school life (McKeon, 1994). Indeed, teaching and learning in school entail socially and culturally distinct forms of communication and interaction (Diaz, Moll, & Mehan, 1986). Thus, the social environment of the school is important for ESOL students because it provides an interpersonal context for learning language that goes beyond language itself and beyond the academic curriculum. It gives social meaning to the patterns of language use in the school and offers social rewards to those who adapt to it successfully. To become fully functioning and valued members of the school and broader community (the ultimate goal of education), ESOL students must learn the sociolinguistic norms of the school and of the broader community of which the school is a part. Indeed, their success as students and ultimately as adults depends on their acquisition of the social and linguistic codes that constitute language.

Taken together, these views of language and language learning derived from research mean that language learning and, therefore, language teaching in school cannot take place in isolation if they are to be useful and successful. They must be integrated with the academic and social development of ESOL students. From the student's point of view, learning ESL in school should be seen as a means to achieving social integration and academic success, not as an end in itself. Otherwise, the motivation to learn English in school will be seriously undermined. From the teacher's point of view, instruction for ESOL students must be seen as the means for achieving these goals in school. This means that ESL teacher candidates must know how to provide the social as well as academic language skills that ESOL students need to integrate academically and socially with native-English-speaking (NS) students in the school. The measure of success at accomplishing this integration can be found in the general academic achievement of ESOL students AND in their social integration into the academic and nonacademic activities of the school.

Considerations of Culture

Effective instruction is developmental. It builds on the skills, knowledge, and experiences that students acquire prior to coming to school and while they are in school, and it extends and broadens their skills and experiences in developmentally meaningful ways throughout the school years. In other words, the starting point for planning and delivering instruction is the student. Thus, the pedagogical approach of choice when working with ESOL students should be first and foremost student centered. From the ESL teacher's point of view, planning and providing instruction on the basis of ESOL students’ existing competencies and using experiences and knowledge that are familiar to ESOL students provides a solid foundation for extending their skills and knowledge in new directions. From the ESOL student's point of view, learning on the basis of established skills and known experiences provides a reassuring context in which to acquire new skills and concepts.
It is widely accepted that there are significant individual differences among students, even within the same cultural and linguistic groups. Such variation reflects the cumulative influences of constitutional and experiential factors, such as socioeconomics, nutrition, and culture. To be developmentally meaningful, instruction for ESOL students must, therefore, also be individualized to take account of important differences among ESOL learners.

The backgrounds of ESOL students from minority cultural groups are clearly different from those of students from the majority language/cultural group in U.S. schools. These differences are often viewed as posing academic problems for ESOL students because the schools they attend are based on and reflect the backgrounds of students from the dominant culture. Although those who take this position do not consciously characterize ESOL students as deficient, they often view them as ill prepared for mainstream schooling. In effect, some educators and policymakers have all too often used the difference view euphemistically as a substitute for the earlier, unfounded deficit view (Bernstein, 1972). Even if it does not imply deficits in the backgrounds of ESOL students, the difference view calls for changes in ESOL students and their families if the mismatch between home and school is to be redressed. Most importantly, the difference perspective fails to provide substantive insights into the specific characteristics of ESOL students, their families, and the communities in which they live that might have a positive impact on their schooling. Thus, it is pedagogically empty.

Recent research in a variety of social and cultural communities has come a long way toward broadening our knowledge and understanding of specific patterns of language, social, and cognitive development in families and communities with diverse sociocultural characteristics (Heath, 1986; Phillips, 1983; Schieffelin & Eisenberg, 1984; Schieffelin & Ochs, 1986). The findings from this research have revealed rich and complex patterns of social interaction, language use, and cultural learning. More specifically, research evidence indicates that students from language minority backgrounds have often had linguistic and cultural experiences in their communities that, as Pease-Alvarez and Vasquez (1994) point out, have been enriched by the home culture, the dominant group culture in which they live, and the multiculturalism that inevitably results from contact and interaction between minority and majority groups in a pluralistic society. In other words, far from being impoverished, deficient, or merely different, the out-of-school experiences of ESOL students are immensely rich and complex. As a result, ESOL students acquire rich funds of knowledge that they bring to school (Moll, Amanti, Neff, & González, 1992).

Research indicates that earlier views that advocated educational programs that sought to remediate or compensate for developmental deficiencies in ESOL students are misguided because these deficiencies are often nonexistent. Moreover, educational views that aim to minimize differences between the cultures of ESOL students and mainstream schools are educationally wasteful because they ignore the capabilities and knowledge that ESOL students bring with them to school. To the contrary, research indicates that the developmentally sound and pedagogically optimistic approach (Diaz, et al., 1986) is to encourage development of the home language and culture of ESOL students where possible in school, and to use the linguistic, cognitive, and sociocultural resources that they bring to school as a basis for planning the formal education in English (Dolson, 1985). Thus, teacher candidates must know how to become knowledgeable about and comfortable with the cultural communities in which their ESOL students grow up and live.
Generally speaking, U.S. schools reflect the knowledge and assumptions held by educational authorities about the experiences and backgrounds of students from the majority cultural group (McGroarty, 1986). Indeed, most public education is based on systematic research on the development and experiences of these children (Heath, 1986). Education can thus be said to be developmentally sensitive to and culturally appropriate for students from the majority culture. For education to be appropriate and sensitive to ESOL students, it is necessary for educators to refocus their attention to also take into account significant background and learning factors particular to the development of these students (McGroarty, 1986). Variation in the background of ESOL students is likely to be extensive, given the considerable diversity among their first languages (L1s), their level of ESL proficiency, their previous educational experiences, their medical conditions, the circumstances in which they live or have come to live in an English-speaking community, and so on. Because ESOL students' backgrounds are so diverse and probably unfamiliar to educators who are not members of these cultural groups, ESL teachers who work with ESOL students must actively seek to know and understand the backgrounds of these students in order to plan effective instruction for them. ESL teacher candidates must know how to do this.

**Considerations of Assessment**

Effective and appropriate assessment of ESOL students, and of instruction intended for ESOL students, shares important fundamental characteristics with assessment of all students and of instruction intended for mainstream students (Cloud, Genesee, & Hamayan, 2000)—it serves the same basic goals (see Table 1) and it has the same essential qualities (see Table 2). ESL teacher candidates must have a thorough understanding of the diverse goals and multiple qualities of effective assessment, why these goals are important, and how to operationalize them in assessing ESOL students. At the same time, there are a number of ways in which assessment of ESOL students and of instruction intended for ESOL students differ. Some of these are listed in Table 3. Most of these differences are associated with the assessment of language proficiency.

### TABLE 1

**ALTERNATIVE GOALS OF ASSESSMENT**

The alternative goals of assessment are to

- demonstrate to others that students are learning as expected
- monitor student progress in order to plan appropriate instruction
- understand students’ learning styles, learning strategies, interests, attitudes, motivations, and relevant background factors that might impinge on classroom learning
- engage students in self-assessment so that they take active responsibility for their own learning
First of all, ESL teachers must be able to distinguish between students’ language proficiency and their competence in the subject matter being taught, at least during the early stages of second language acquisition (SLA). NS students, who are educated through the medium of English, already have considerable proficiency in the language of instruction when they begin school, although even these students continue to develop their language skills for academic purposes in school. These students generally have sufficient proficiency in English to express what they are learning in their school subjects. In contrast, ESOL students, who are learning through the medium of ESL, often initially lack even rudimentary language skills in English. As a result, they can be challenged to express through language what they are learning in the content areas. ESL teacher candidates must be able to assess ESOL students’ academic achievement during the initial stages of learning using methods that require only basic skills in the target language. As ESOL students progress into the higher grades, they must acquire the specialized language skills that are integral to mastery of and communication about advanced academic subject matter, for example, in math and science. ESL teacher candidates must be able to assess their proficiency in these specialized language skills in order to determine if they are acquiring the advanced academic language skills that are a critical aspect of those subjects. ESL teacher candidates must know, understand, and be able to use a variety of assessment techniques that will serve the varied educational levels and language needs of ESOL students.
TABLE 3
DISTINCTIVE FEATURES OF ASSESSMENT OF AND FOR ESOL STUDENTS

Assessment of ESOL students should
- distinguish between students’ language proficiency and their academic achievement
- monitor students’ proficiency in language for both academic and social purposes
- assess students’ sociocultural competence with respect to language use and social interaction in the target language
- be culturally appropriate

Second, whereas other teachers can assume that their students have already acquired or will acquire, without instruction, the social language skills they need to interact effectively with other students and adults in (and outside) school, this is not necessarily the case for ESOL students. Some ESOL students may lack even basic social skills in English and, thus, they may have difficulty interacting with mainstream students. ESL teacher candidates must be able to monitor their students’ proficiency in the social uses of English in order to identify those aspects of social discourse where students need systematic instruction. Thus, in addition to monitoring and planning for ESOL students’ acquisition of academic language skills, ESL teacher candidates must also know how to monitor the students’ language skills in social situations so that they can plan for development in this domain of language use.

Third, whereas mainstream students who are educated through their L1 learn the sociocultural norms associated with social interaction and language use, this is often not the case for ESOL students. ESL teacher candidates must know how to assess ESOL students’ sociocultural competence with respect to language use and social interaction and to identify gaps in their sociocultural development and assist them in learning relevant norms and customs.

A fourth aspect of assessment of and for ESOL students that is different from assessment for mainstream students is that it must be sensitive to cultural differences. This can even be an issue among NSs from different cultural backgrounds (e.g., English-speaking African American, Asian American, or Hispanic). ESL teacher candidates must know how to identify and take account of cultural differences among ESOL and NS students when planning and interpreting assessment. Table 4 summarizes some of these variables. ESL teacher candidates should be familiar with these and other such variables and know how to adapt their assessment methods to accommodate such factors for students from different cultural backgrounds. Clearly, ESL teacher candidates need to know a variety of assessment methods and how to use them creatively to meet their diverse and changing assessment needs.

TABLE 4
CULTURAL VARIABLES IN ESL ASSESSMENT

- **Wait time**: ESOL students from some cultural groups require longer wait times than NS students from majority cultural backgrounds.

- **Individual or group response**: ESOL students from some cultural backgrounds prefer to respond to teachers’ questions or calls for displays of knowledge as part of the entire group; they are reluctant to give individual responses because they think it is inappropriate. Some students also prefer to work with their fellow students to formulate a response to a teacher's questions. This is frowned on by Anglo-American culture but is highly valued and preferred by many other cultural groups.

- **Feedback**: Whereas English-speaking students from the majority culture like to receive individual and public praise from the teacher, ESOL students from some cultures are deeply embarrassed by such praise; they do not expect public or explicit praise from the teacher.

- **Eye contact**: In contrast to students from the dominant Anglo-American culture who are taught to look directly at adults when being spoken to, ESOL students from many cultures are taught that direct eye contact with adults is inappropriate and is a sign of impertinence.

- **Guessing**: Some ESOL students will not give the answer to a question unless they are certain that they are accurate; Anglo-American students are generally comfortable with guessing.

- **Question & Answer format**: Some ESOL students may not understand or have had prior experience with certain question and/or answer formats; for example, they may not understand how to fill in black bubbles often used in multiple-choice question formats.

- **Volunteering**: ESOL students from many cultural groups are very uncomfortable showing what they know by volunteering a response or initiating interaction with the teacher; such behavior is seen to be bragging and showing off. Chorale or group responding can be used to circumvent this cultural preference.

III. Organization of Standards

The standards are organized around five domains: Language, Culture, Instruction, Assessment and the core, which is Professionalism. Each of the domains are further divided into Standards. There are a total of 13 standards. The standards themselves are divided into performance indicators. These indicators are to help you identify evidence of candidate performance. These performance indicators can be met at three proficiency levels:

- **Approaches Standard.** Candidate has knowledge about subject content, but does not yet adequately apply it to the classroom.
- **Meets Standard.** Candidates demonstrate the dispositions, knowledge, and skills to effectively teach ESOL learners. Candidates apply that knowledge within the classroom and other professional teaching situations.
- **Exceeds Standard.** Teacher candidates consistently display dispositions, knowledge, and skills associated with candidates who demonstrate positive effects on student learning and go on to successful teaching. It is expected that teacher candidates who exceed standards would be good candidates after the required 3 years of teaching for National Board for Professional Teacher Standards Certification under “English as a New Language.”

Below is a visual representation of how the five domains and standards are interrelated.

IV. TESOL STANDARDS FOR P–12 ESL TEACHER EDUCATION PROGRAMS

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
Domain 1: Language

Candidates know, understand, and use the major concepts, theories, and research related to the nature and acquisition of language to construct learning environments that support ESOL students’ language and literacy development and content area achievement.

Standard 1.a. Describing language. Candidates demonstrate understanding of language as a system and demonstrate a high level of competence in helping ESOL students acquire and use English in listening, speaking, reading, and writing for social and academic purposes.

Standard 1.b. Language acquisition and development. Candidates understand and apply concepts, theories, research, and practice to facilitate the acquisition of a primary and a new language in and out of classroom settings.

Standard 1.a. Describing Language

Candidates demonstrate understanding of language as a system and demonstrate a high level of competence in helping ESOL students acquire and use English in listening, speaking, reading, and writing for social and academic purposes.

Supporting Explanation

Candidates need a conscious knowledge of language as a system in order to be effective language teachers. Components of the language system include phonology, morphology, syntax, semantics, pragmatics, discourse varieties, aspects of social and academic language, rhetorical registers, and writing conventions. Teachers use this knowledge to develop appropriate goals and a wide variety of techniques for teaching ESOL students to listen, speak, read, and write so that students may communicate effectively in English and monitor their own use of language.

Candidates understand the ways in which languages are similar and different. Candidates identify linguistic structures that distinguish written and spoken language forms as well as those representing social and academic uses of language. Candidates understand the elements of an L2 that tend to be acquired in developmental stages as well as the effect that one’s L1 may have on learning an L2.

Candidates relate their knowledge of English to languages commonly spoken by their students. Candidates build on similarities between English and students’ home languages, and anticipate difficulties that learners may have with English. Candidates identify errors that are meaningful and systematic and distinguish between those that may benefit from corrective feedback and those that will not. Candidates understand the role and significance of errors as a sign of language learning and plan appropriate classroom activities to assist ESOL students through this process.

Candidates apply knowledge of language variation, including dialect and gender-based differences, discourse varieties, rhetoric, politeness, humor, and slang. Candidates serve as good models of language and use a range of instructional approaches in response to learners’ different needs as they pertain to the effective and progressive development of ESL.
Rubric for Standard 1.a.
Describing Language

These rubrics are additive. *Meets Standard* assumes that the candidate has also met the criteria under *Approaches Standard*. *Exceeds Standards* assumes that the candidate has also met the criteria under *Approaches Standard* and *Meets Standard*.

| 1.a.1. Apply knowledge of phonology (the sound system) to help ESOL students develop oral, reading, and writing (including spelling) skills in English. | • Candidates understand elements of phonology and recognize stages of phonological development in ESOL learners.  
• Candidates recognize and can describe similarities and major differences between the phonology of English and those of languages commonly spoken by their students.  
• Candidates understand the nature and importance of phonemic awareness and of sound-symbol correspondence with respect to early literacy development. | • Candidates apply knowledge of developmental and contrastive phonology to identify difficult aspects of English pronunciation for their students, noting how ESOL students’ L1 and identity may affect their English pronunciation.  
• Candidates develop contextualized activities to assist ESOL students in developing phonemic awareness as well as other reading skills.  
• Candidates help ESOL students develop strategies to monitor and develop proficiency in difficult aspects of English phonology. | |
| 1.a.2. Apply knowledge of morphology (the structure of words) to assist ESOL students’ development of oral and literacy skills in English. | • Candidates understand how morphemes are combined to form words in English and recognize stages of morphological development in ESOL learners.  
• Candidates recognize and can describe similarities and major differences between the morphology of English and those of languages commonly spoken by their students.  
• Candidates understand the role of morphological cueing systems and cognates in reading and writing. | • Candidates apply knowledge of developmental and contrastive morphology to facilitate ESOL students’ acquisition of English oral and literacy skills.  
• Candidates design contextualized activities to provide input and practice of patterns of English word formation.  
• Candidates assist ESOL students in developing strategies to learn new words and to apply their knowledge of morphology to the English lexicon. | |
| 1.a.3. Apply knowledge of syntax (phrase and sentence structure) to help ESOL students develop oral, reading, and writing (including spelling) skills in English. | • Candidates understand that sentences are | • Candidates design contextualized | • Candidates help ESOL students develop |
| 1.a.4. Apply understanding of semantics (word/sentence meaning) to assist ESOL students in acquiring and productively using a wide range of vocabulary in English. | • Candidates understand the system of semantics and have reasonable expectations for ESOL students’ semantic and lexical development.  
  • Candidates recognize differences in vocabulary used in spoken and written contexts in English and can identify key content vocabulary in academic subject areas.  
  • Candidates understand how cognates and false cognates, idioms, and other nonliteral expressions can affect ESOL students’ understanding and acquisition of spoken and written English. | • Candidates apply knowledge of how meaning is constructed in English to assist ESOL students to develop and use a wide range of vocabulary in English.  
  • Candidates design instructional activities to help ESOL students to understand and use vocabulary appropriately in spoken and written language.  
  • Candidates provide ESOL students with timely input and sufficient contextualized practice, with particular attention to semantic and thematic groupings of new vocabulary, idioms, cognates, and collocations. | • Candidates help ESOL students develop effective strategies for acquiring and using vocabulary in English meaningfully in spoken and written form. |

Standard 1.b. Language Acquisition and Development

Candidates understand and apply concepts, theories, research, and practice to facilitate the acquisition of a primary and a new language in and out of classroom settings.

Supporting Explanation

Candidates understand the importance of language in the classroom and are able to create a language-rich learning environment to foster L1 and L2 development among ESOL students. Candidates understand the communicative, social, and constructive nature of language and provide regular opportunities for meaningful interaction in the classroom. Candidates are able to use linguistic scaffolding to aid ESOL students’ comprehension and production. Candidates understand the role of personal and affective variables in language learning and establish secure, motivating classrooms in which ESOL students are encouraged to take risks and use language productively, extending their conceptual knowledge as well as their language and literacy skills.

Candidates understand how different theories of language acquisition (for L1 and L2) have shaped views of how language is learned, ranging from behaviorist to cognitive and social interactionist perspectives. Candidates are familiar with key research in SLA (e.g., research into developmental stages and sequences, the effects of instruction and feedback, the nature and role of universal grammar, the role of L1 transfer, L2 input, and communicative interaction), and are able to apply these findings in the classroom. Candidates also understand that individual learner variables such as age and cognitive development, literacy level in the L1, personality, motivation, and learning style can affect learning in the L1 and L2.

Candidates understand the processes of language and literacy development, use this knowledge to provide optimal language input, and set appropriate goals and tasks for integrated oral and written language development. Candidates are familiar with developmental stages and understand that errors are often signs of language learning. Candidates understand the sources of many types of errors and know when and how to provide appropriate feedback for learners’ developing language. Candidates understand the long-term nature of the language learning process and hold high expectations for ESOL learners with appropriate challenges and support.

Candidates understand the important foundation set by the home language; the cognitive, linguistic, and academic benefits of home language development; and the potential transfer of language skills and strategies from the L1 to the L2. Candidates understand that ESOL students come to class with previously developed language skills and, whenever possible, candidates extend and use a student’s L1 as a resource for learning the new language and for learning in other areas. Candidates understand that proficiency in an L2 (or subsequent language) does not have to come at the cost of the L1. Candidates understand the sociocultural variables affecting the learning of an L2 and the maintenance of an L1. Candidates understand the systematic nature of code switching, and know that code switching is a rule-driven communication strategy used for filling in gaps in the lexicon in the L2 as well as for building community, expressing identity, and participating in social interaction.

Candidates understand the role that variables such as identity and affect play in L2 development. Candidates are aware of the possible negative effects of losing a home language and encourage the maintenance and development of students’ L1s, even when formal bilingual programs are not available.

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
Candidates understand the dimensions of language proficiency and are able to assist ESOL learners in developing sophisticated academic language skills as well as socially appropriate language skills in English language arts and other content areas. Candidates understand that although L1 literacy (reading and writing) typically follows oral language development, L2 literacy learning may be integrated with oral and skills development. Candidates provide a text-rich environment in which ESOL students are encouraged to read and express themselves in writing, regardless of their level of fluency or formal accuracy. Candidates encourage and assist ESOL students in developing learning strategies that will help with their continued language and content-area development.

**Standard 2.a. Nature and Role of Culture**

Candidates know, understand, and use the major concepts, principles, theories, and research related to the nature and role of culture in language development and academic achievement that support individual students’ learning.

**Supporting Explanation**

To enhance the learning of their students, candidates draw on their knowledge of the nature, role, and content of culture. The nature and role of culture encompass such topics as cultural relativism, cultural universalism, the additive nature of culture, intra- and intergroup differences, the interrelationship between language and culture and the effect of this relationship on learning, and the impact of geography on cultural forms and practices. The content of a culture includes values, beliefs, and expectations; roles and status; family structure, function, and socialization; humanities and the arts; assumptions about literacy and other content areas; communication and communication systems; and learning styles and modalities (e.g., cooperation versus competition, visual/holistic versus verbal/linear-sequential, and individual versus group). From this knowledge base, candidates draw valid conclusions about cultural differences to design learning environments that support individual student learning.

| language and culture (e.g., different cultures express numbers and colors differently.) | students to independently extend their knowledge about one another’s languages and cultures. • Candidates act as facilitators to help students transition between the home culture and language and the U.S./school culture and language. |
Standard 2.b. Cultural Groups and Identity

Candidates know, understand, and use knowledge of how cultural groups and students’ cultural identities affect language learning and school achievement.

Supporting Explanation

Candidates consider diversity an asset and respond positively to it. Candidates recognize that every student comes to school with a language and culture and that that language and culture interact and form the student’s identity. Candidates further recognize that students’ identity is tied closely to students’ sense of self-worth, which frequently is correlated to their academic achievement. Candidates know that all students can learn when cultural factors are recognized, respected, and accommodated, and they demonstrate that knowledge in their practice.

As candidates create meaningful language learning experiences they also develop students’ cross-cultural competence by comparing and contrasting ways in which cultures and social groups are similar and different. Candidates know, understand, and use the nature of cultural diversity and migration and immigration in the United States to improve the achievement and language development of students. Candidates must continually learn about the various factors of their students’ backgrounds and add to their repertoire of teaching techniques in order to meet the diverse needs of all their students.
Rubric for Standard 2.b.  
Cultural Groups and Identity

Standard 3.a. Planning for Standards-Based ESL and Content Instruction

Candidates know, understand, and apply concepts, research, and best practices to plan classroom instruction in a supportive learning environment for ESOL students. Candidates serve as effective English language models, as they plan for multilevel classrooms with learners from diverse backgrounds using standards-based ESL and content curriculum.

Supporting Explanation

Candidates plan their classrooms as supportive, positive climates for language learning. They model positive attitudes and interactions toward those who are different from themselves and assist students to build respect for their classmates and to listen and consider others’ perspectives. Language-building activities are planned for student-centered learning, where students contribute ideas for themes and projects. Cooperative learning and flexible grouping are included.

Candidates use assessment of students’ knowledge with multiple measures (see Domain 4) and provide for their students’ diverse backgrounds, developmental needs, and English proficiency as they plan their instruction. They plan from specific ESL and content, standards-based objectives but include multiple ways of presenting content. Candidates collaborate with content-area teachers to ensure that ESOL students access the whole curriculum while learning English. Candidates plan for a variety of instructional techniques for students with limited formal schooling (LFS) based on collaborative decisions with colleagues. They plan for specific instruction in a variety of settings in which students may first learn concepts of print and subsequently join other groups of students, where they may demonstrate their skills and continue to learn with peers.

</table>
| **3.a.2. Create environments that promote standards-based language learning in supportive, accepting classrooms and schools.** | • Candidates recognize ESOL students’ various approaches to learning.  
• Candidates are knowledgeable about effective program models, including those that are standards based. | • Candidates establish classroom routines during which students demonstrate appreciation for one another.  
• Candidates implement standards-based programs and instructional models appropriate to student needs. | • Candidates systematically plan ESL and content instruction that is student centered.  
• Candidates plan lessons such that students can meet learning objectives and assist one another. |
| **3.a.3. Plan students’ learning experiences based on assessment of language proficiency and prior knowledge.** | • Candidates are aware of students’ language proficiency and prior knowledge when planning ESL and content-learning activities.  
• Candidates understand that different cultures approach the education of children in different ways. | • Candidates plan activities at the appropriate language levels, integrating students’ cultural backgrounds and learning styles.  
• Candidates use students’ prior knowledge in planning ESL and content instruction. | • Candidates plan multilevel activities and are flexible in grouping students to meet instructional needs of linguistically and culturally diverse student populations. |
| **3.a.4. Provide for particular needs of students with limited formal schooling (LFS) in their L1.** | • Candidates identify communication strengths of LFS students.  
• Candidates plan a few teaching strategies appropriate for LFS students. | • Candidates plan ESL and content instruction to meet reading and writing needs of LFS students in ESL and content areas.  
• Candidates plan visually supportive, text-rich environments using appropriate materials that include students’ personal and shared experiences.  
• Candidates plan assessment of LFS students’ competence with text.  
• Candidates plan communication that LFS students will understand. | • Candidates plan ways to motivate and guide LFS students to successful academic experiences.  
• Candidates plan learning tasks specific to the needs of LFS students. |
Standard 3.b. Managing and Implementing Standards-Based ESL and Content Instruction

Candidates know, manage, and implement a variety of standards-based teaching strategies and techniques for developing and integrating English listening, speaking, reading, and writing, and for accessing the core curriculum. Candidates support ESOL students in accessing the core curriculum as they learn language and academic content together.

Supporting Explanation

Candidates view language and content learning as joint means to achieve ESOL students’ academic and language development goals. They understand that language is developed most effectively in meaningful contexts and they manage and implement learning around subject matter and language learning objectives. They also understand that such learning is more effective when it is standards based.

ESL teachers at all grade levels provide ESL and content instruction and assessment that are standards based and that integrate listening, speaking, reading, and writing for purposes that are relevant and meaningful to students. They also design activities and provide materials that build strengths in each skill area while also supporting and extending strengths in other skill areas.

Candidates provide a wide variety of activities for students to develop and practice their listening, speaking, reading, and writing skills in social and academic environments based on student interest, texts and themes, a range of genres, and personal experiences to enhance students’ expression in English and other content areas.

Standard 3.c. Using Resources Effectively in ESL and Content Instruction

Candidates are familiar with a wide range of standards-based materials, resources, and technologies, and choose, adapt, and use them in effective ESL and content teaching.

Supporting Explanation

Instructional materials are tools ESL teachers use to support their practice. Selecting materials for ESOL students presents distinct challenges. Candidates learn to provide materials that are rich, interesting, and motivating. Culturally responsive resources connect students’ previous cultural experiences and/or provide necessary background information needed for them to understand the materials. Candidates must also know how to assure that materials are linguistically accessible and age appropriate. Candidates match materials to the range of developing language and content-area abilities of students at various stages of learning. Teachers also determine how and when it is appropriate to use L1 resources to support English-language learning.

Candidates are capable of finding, creating, and using a wide range of print and nonprint resources, including ESL curricula, trade books, audiovisual materials as well as published and on-line multimedia materials. Candidates also are knowledgeable regarding the selection and use of technological tools to enhance language instruction, including computer software and Internet resources. In addition, candidates understand their advocacy role in assuring instruction in the use of technology and access to technological tools for learners of English.
Rubric for Standard 3.c.
Using Resources Effectively in ESL Instruction

These rubrics are additive. *Meets Standard* assumes that the candidate has also met the criteria under *Approaches Standard*. *Exceeds Standards* assumes that the candidate has also met the criteria under *Approaches Standard* and *Meets Standard*.

Standard 4.a. Issues of Assessment for ESL

Candidates understand various issues of assessment (e.g., cultural and linguistic bias; political, social, and psychological factors) in assessment, IQ, and special education testing (including gifted and talented), the importance of standards–based assessment, and the difference between language proficiency and other types of assessment (e.g., standardized achievement tests of overall mastery), as they affect ESOL student learning.

Supporting Explanation

Candidates understand the different purposes of assessment (e.g., diagnostic, language proficiency, academic achievement) and the basic concepts of assessment in order to be prepared to assess ESOL learners. For example, measures of any type of knowledge or ability (including language) that are standards based should be equitable (fair), accurate (valid), consistent (reliable), and practical (easy) to administer. Authentic or performance-based assessment measures often best meet these criteria. The more closely assessment tasks resemble instructional activities, the more likely they are to assess what has been taught and learned and to inform further instruction.

Candidates understand the variety of ways in which assessments of ESOL learners may be biased and therefore invalid measures of what they know and can do. Such assessments may contain cultural bias (e.g., images or references that are unfamiliar to ESOL learners). Assessments may also contain linguistic bias (e.g., items overtly or implicitly favoring speakers of standard dialects or items that are more difficult for ESOL learners because of complex language). ESOL students may also be challenged in formal test situations if they are unfamiliar with item types (e.g., multiple choice) or response formats (e.g., bubble sheets), or if they are unfamiliar with timed, competitive, high-stakes testing. Candidates are able to identify such biasing elements in assessment situations and work to help ESOL students become familiar with the content and conditions of tests in school.

Candidates can assess ESOL students in order to help distinguish the differences among normal language development, language differences, and learning problems. Candidates understand that if a learning problem cannot be verified in the native language of the student, then it is unlikely to be a learning problem in English. Candidates use multiple sources of information (e.g., native language assessment, home, other teachers, other learners from the same cultural group, teaching style, the curriculum) to make appropriate adjustments before the problem is assumed to reside within the learner and make a referral for special education assessment. Candidates are also cognizant of factors that would prevent ESOL students from being identified as gifted and talented, based on their English language proficiency.
Rubric for 4.a. Issues of Assessment for ESL

These rubrics are additive. *Meets Standard* assumes that the candidate has also met the criteria under *Approaches Standard.* *Exceeds Standards* assumes that the candidate has also met the criteria under Approaches Standard and Meets Standard.

</table>
Standard 4.b. Language Proficiency Assessment

Candidates know and can use a variety of standards-based language proficiency instruments to inform their instruction, and understand their uses for identification, placement, and demonstration of language growth of ESOL students.

Supporting Explanation

Candidates are familiar with national and state requirements, procedures, and instruments for ESOL student identification, reclassification, and exit from language support programs. Candidates use available standardized language proficiency tests to measure ESOL students’ language skills. They also use criterion and norm-referenced language proficiency instruments as appropriate. Candidates design assessment tasks that measure students’ discrete and integrated language skills and their ability to use language communicatively within a range of contexts.

Candidates are aware that the term language proficiency assessment may be used synonymously with language achievement assessment to mean those developed by teachers or outside the classroom to show language growth, whereas standardized achievement tests usually refer to measures developed commercially or at the district or state level that are intended to determine how schools in general are doing in such areas as reading, math, and science.
Rubric for Standard 4.b.  
Language Proficiency Assessment

These rubrics are additive. *Meets Standard* assumes that the candidate has also met the criteria under *Approaches Standard*. *Exceeds Standards* assumes that the candidate has also met the criteria under *Approaches Standard* and *Meets Standard*.

</tr>
<tr>
<td><strong>4.b.4. Understand, construct, and use assessment measures for a variety of purposes for ESOL students.</strong></td>
<td>• Candidates understand a variety of purposes for assessment of ESOL learners (e.g., proficiency, diagnosis, placement, and classroom instruction and achievement). • Candidates are aware of the importance of using multiple measures to accurately assess ESOL learners.</td>
<td>• Candidates use multiple and appropriate assessment measures for a variety of purposes, including classroom and student self-assessment and technology-based assessment (e.g., audio, video, computer).</td>
<td>• Candidates design and adapt classroom tests and alternative assessment measures to make them appropriate for ESOL learners for a variety of purposes.</td>
</tr>
</tbody>
</table>
| 4.b.5. Assess ESOL learners’ language skills and communicative competence using multiple sources of information. | • Candidates use simple measures and a limited number of sources of information to assess ESOL learners’ individual language skills and communicative ability. | • Candidates assess ESOL learners’ discrete and integrated ability to use grammar, vocabulary, listening, speaking, reading, and writing to communicate appropriately using performance-based measures.  
• Candidates use multiple measures and sources of information to assess ESOL learners and to determine if they have special needs (e.g., gifted and talented or learning disabilities not based on language). | • Candidates create multiple performance-based measures to assess students’ language skills and communicative competence across the curriculum.  
• Candidates share these measures with their colleagues. |
Standard 4.c. Classroom-Based Assessment for ESL

Candidates know and use a variety of classroom and performance-based assessment tools that are standards based to inform instruction.

Supporting Explanation

Candidates understand the interdependent relationship between teaching and assessment and are able to develop instructional tasks and assessment tools that promote and measure student learning. Candidates design and develop assessment goals, tools, and tasks appropriate for ESOL students that correspond with state and national standards in ESOL and content areas such as math, science, and social studies. Candidates are able to assess learners’ content-area achievement independently from their language ability and should be able to adapt classroom tests and tasks for ESOL learners at varying stages of English language and literacy development.

Candidates understand that portfolios are important tools in the assessment of ESOL student learning. A portfolio is a selection taken from a collection of student work that reflects progress over time. Portfolio samples typically are based on work conducted as part of class activities or home assignments, reflecting the characteristics of performance assessment. Performance assessment requires learners to directly demonstrate a specific skill (the ability to write a summary is demonstrated through a written summary; the ability to orally debate an issue is demonstrated through an oral debate).

Self-assessment and peer-assessment techniques can be used regularly to encourage students to monitor and take control of their own learning. The teaching of test-taking and learning strategies has an important place in the ESOL classroom.

Candidates evaluate and develop classroom measures using a variety of item types and elicitation and response formats to assess students’ receptive and productive language skills. Candidates assess their ESOL students’ literacy skills appropriately in English and know how to obtain information on their language and literacy skills in the native language. Candidates understand that some classroom reading techniques, such as independent oral reading, may be uninformative or misleading as assessment tools for ESOL students who may be overly concerned with the pronunciation demands of the task and pay less attention to comprehension.

Candidates should understand and use criterion and norm-referenced interpretations of assessment scores appropriately, according to the purpose of the assessment.

Standard 5.a. ESL Research and History

Candidates demonstrate knowledge of history, research, and current practice in the field of ESL teaching and apply this knowledge to improve teaching and learning.

Supporting Explanation

Candidates know, understand, and use a variety of research-based L2 teaching strategies and methods. Candidates select appropriate techniques for instruction.

Candidates understand legal processes, mandates, and policies that have had an impact on the development of the field of ESL. They are knowledgeable about the history of legal decisions (e.g., Lau v. Nichols) and their subsequent application to the instruction of ESOL students. They understand and can interpret the state and federal requirements in determining a school district’s compliance with state and federal guidelines. Furthermore, they understand how the structure of a ESL program can affect teaching and learning within that program.

• Candidates assist policy makers to understand the curricula and instructional approaches that best meet the needs of ESOL students in their community. |
| 5.b.3. Advocate for ESOL students’ access to all available academic resources, including instructional technology. | • Candidates understand the importance of ensuring ESOL students’ access to school resources, including technology. | • Candidates share with colleagues the importance of ESOL students’ equal access to educational resources, including technology. | • Candidates assist colleagues to appropriately select, adapt, and customize resources for use by ESOL students. |
Standard 5.c. Professional Development and Collaboration

Candidates collaborate with and are prepared to serve as a resource to all staff, including paraprofessionals, to improve learning for all ESOL students.

Supporting Explanation

Candidates take advantage of professional growth opportunities. They accept and embrace the role of ESOL advocate and resource person in their schools and districts. They are active, contributing members of their professional association(s).

Candidates collaborate with staff in the school in order to provide a wide range of educational opportunities for ESOL students at all proficiencies of English and with diverse special learning needs. ESL teachers develop instructional schedules in collaboration with guidance staff and other teachers to provide access to challenging course work in language and general education/content classrooms. They serve as a resource to promote a school environment that values diverse student populations and to advocate for equitable access to resources for ESOL students.

Candidates teach and plan collaboratively with general education/content teachers in a variety of teaching models. These shared teaching responsibilities provide ESOL students with greater access to content instruction through ESL instructional methods and strategies.

Candidates serve as strong models of academic English language proficiency, although they may not necessarily possess native-like proficiency. Linguistic competence in a language other than English is part of candidates’ professional preparation.
Rubric for Standard 5.c.  
Professional Development and Collaboration

These rubrics are additive. *Meets Standard* assumes that the candidate has also met the criteria under *Approaches Standard*. *Exceeds Standard* assumes that the candidate has also met the criteria under Approaches Standard and Meets Standard.

| **5.c.1. Establish professional goals and pursue opportunities to grow in the field of ESL.** | • Candidates formulate professional development plans based on their interests.  
• Candidates are aware of their professional associations. | • Candidates implement a personal professional development plan based on interests and reflection, taking advantage of opportunities in professional associations and other academic organizations. | • Candidates engage in a continuous cycle of ESL professional development that is informed by their instructional reflections and analysis.  
• Candidates take active roles in their professional association(s). |
| **5.c.2. Work with other teachers and staff to provide comprehensive, challenging educational opportunities for ESOL students in the school.** | • Candidates understand the importance of establishing collaborative relationships among ESL staff members and all departments and resource personnel in the school. | • Candidates collaborate with general and specialist school staff (e.g., multidisciplinary faculty teams) to establish an instructional program appropriate for ESOL students at a variety of English proficiency levels. | • Candidates provide leadership to staff in scheduling appropriate classes and instructional opportunities for ESOL students. |
| **5.c.3. Engage in collaborative teaching in general education and content-area classrooms.** | • Candidates study and practice a variety of collaborative teaching models (e.g., parallel teaching, station teaching, alternative teaching, team teaching). | • Candidates teach and plan collaboratively with other teachers to assist ESOL students as they transition into general education and content-area classrooms. | • Candidates continue to learn about other content areas so they may share greater responsibility for effective instruction and student success in those classes. |
| **5.c.4. Model academic proficiency in the English language.** | • Candidates are proficient in the English language. | • Candidates model effective use of the English language for academic purposes. | • Candidates assist their content-area colleagues in becoming effective models of academic English. |

V. GUIDANCE FOR INSTITUTIONS: INSTRUCTIONS FOR PREPARING THE PROGRAM REPORT

Who Should Respond to These Program Standards?

All institutions that offer initial programs to prepare P–12 ESL teachers should write and submit a program report.

Who Should Not Respond to These Program Standards?

These standards are not designed for advanced-degree programs, which are those at the postbaccalaureate level that offer advanced-level education to candidates who have previously completed an initial ESL teacher education program or an initial and/or advanced ESL teacher education program.

When Should Program Reports Be Submitted?

Program reports should be submitted on the following schedule:

- For spring NCATE visits: February 1 of the preceding year. (The response from TESOL should be available by June 15.)
- For fall NCATE visits: September 15 of the preceding year. (The response from TESOL should be available by February 1.)

The TESOL/NCATE Standards for the Accreditation of Initial Programs in P–12 ESL Teacher Education is available on the NCATE Web site at http://www.ncate.org/. Click on “Standards,” then on “Program Standards” and follow the links. The document is also available on the TESOL Web site at http://www.tesol.org/ under “Standards & Initiatives.”

What Should Be Included in the Program Report?

The NCATE program report for the preparation of P–12 ESL teachers must include narrative responses to the items listed on the cover sheet. Create a program matrix aligned to the standards/performance indicators matrix. Use the program matrix to provide evidence of candidate performance, candidate and program assessment measures, and evidence of program outcome effectiveness.

Indicate on the program matrix the location in the program report of supporting evidence (e.g., performance indicators, assessments, results of assessments, ties to the rubrics). Also indicate the standard(s) being addressed (e.g., 1.a, 1.b, 3.c) in the margin of the supporting evidence documents where proof of compliance with the standard appears. Use the indicators listed under each of the standards as a guide to expectations for teaching and learning in each area.

For program report review purposes, it is important to understand the need for performance assessment evidence. This evidence is defined as assessment results that demonstrate that
candidates have met the standards and that their students have learned. Listing only what has been taught to candidates is not sufficient.

What Are the Specific Requirements for Length, Organization, and Format of the Program Report?

Length

The program report is limited to 140 pages and should consist of the three sections described under Organization below. Please see instructions for submitting a report electronically at http://www.tesol.org/. Click on “Standards & Initiatives” and follow the links for “P–12 ESL Teacher Education Programs.”

Organization

Section 1: Program Description. Include items listed on the cover sheet in this section, which should not exceed 25-30 pages. The description should also include a completed “Compliance With Program Criteria” page.

Section 2: Performance Evidence: The purpose of this section is to provide documentation of candidate proficiency in relation to standards and should cross-reference supporting evidence in the Appendix.

Section 3: Appendix. This documentation should include descriptions of candidate performance activities; candidate and program assessment results; documentation of program outcome effectiveness, such as survey summaries; a compilation of state licensure data; faculty criteria; course syllabi; summaries of internship evaluations; and so on. Items in the appendixes should be aligned with and cross-referenced to the appropriate domains and standards.

Note: Institutions providing candidate logs or actual candidate projects or papers can consider 10 pages of each the equivalent of one program report page.

Format

Location Guides

- Tab each of the different sections of the report and the contents of the appendix.
- Provide explicit page references to specify examples to which reviewers should refer for particular standards and performance indicators.
- Provide a table that cross-references domains, standards, and performance indicators with assessments used, the aggregation of results, and pages where the examples can be found.
- Program reports that provide aggregated information for a domain and that domain's standards and performance indicators in one volume and referenced examples in a separate volume will help the reviewer see both pieces of information simultaneously.

Formatting/Editing

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
• Number the pages in consecutive order for the entire document.
• Do not use a font size smaller than 12-point.
• Use line spacing that is at least 1.5".
• Cite the text of the standard at the heading of each response.
• Provide specific references to documentation in the explanation or narrative for each standard.
• Make certain that the writing is legible in facsimiles of candidate work.
• When citing/discussing any standard tests, include descriptive information, such as title, scope, congruence with the ESL preparation standards, and passing scores.
• In reporting test results, show the range of performance of candidates at the Approaches Standard/Meets Standard/Exceeds Standard level(s).
• Use graphs, tables, and charts wherever possible as a way to summarize information efficiently.
• Clearly label data displayed on tables and charts; provide instructions to reviewers on how example data statements should be read.
• Use nontextual/visual images where they might assist the reviewer.

How Many Copies of the Program Report Must Be Submitted and to Whom Should They Be Sent?

Five spiral-bound copies of the program report, along with the institution’s precondition package, should be sent to the NCATE office at: NCATE; 2010 Massachusetts Avenue, Suite 500; Washington, DC 20036-1023 USA. An institution that wishes to submit an electronic program report must contact the TESOL program review coordinator, Jason Majesky, by telephone at 703-518-2527 or by e-mail at jmajesky@tesol.org to make special arrangements about specific requirements. The following data submission information applies as well to electronic portfolio submissions.

What Are Some Suggestions for Addressing the Components of the Performance Evidence Section?

Evidence

The evidence presented in the program report should be representative of the requirements for candidate performance activities in the program, much like an artist’s portfolio is a collection of creative products to demonstrate professional ability. Institutions should select examples of candidate assessments that demonstrate progress or document capabilities and attitudes. The examples may also describe processes applied to analyze candidate work. By demonstrating candidate growth and achievement, the focus is on learner progress while providing guidance for future instructional and programmatic changes. It is not expected that every candidate in a program will be included as a part of the institution’s program report. Rather, the reviewers seek representative samples of candidate assessments or analyses of aggregated candidate performance. (See the Glossary and the section on assessment for additional information.)
Each performance assessment must be described to reflect the relationship of the activity to the performance indicators for the standards being addressed. When activities apply to more than one standard, this should be clearly indicated. Should an activity fail to show clearly how an indicator is being met, provide a description and/or examples either in the space provided on the matrix or on a labeled attachment. Reviewers of the program report will check the performance indicators, the assessments, and program outcome measurements to determine whether or not the performance expectations for each standard have been adequately met.

Performance evidence and results (ability to apply skills) may be presented as follows:

1. through descriptions of performance assessment indicators (e.g., found in syllabi or other sections of the document), AND
2. by providing evidence of successful application in real settings

Performance and assessment evidence must have sufficient description to show alignment with the standard(s) being addressed and include a cross-reference to the program matrix.

1. **Organize the evidence around the standards**

   The purpose of this portion of the program report is to provide evidence of candidate proficiency in relation to the standards. The narrative should cover all of the 13 standards for ESL teacher candidates, even though a program may have collected stronger evidence for some standards than for others. Because review of the evidence (the aggregated, summarized, and interpreted data) for each standard forms the basis for reaching judgments as to whether standards are met or not met, this guideline is the most important of all. Evidence that is not structured around the standards is difficult or impossible for reviewers to use.

2. **Provide evidence of candidate dispositions, knowledge, and skills across the five domains and 13 standards**

   The sampled data must include candidate proficiency information in terms of the candidate’s disposition, knowledge, and skills, or plans for assessments, within the curriculum standards that directly address Domain 1 (Language), Domain 2 (Culture), Domain 3 (Instruction), Domain 4 (Assessment), and Domain 5 (Professionalism).

3. **Interpret the data**

   The candidate proficiency data should be discussed to let the reviewer know what it means. Reviewers need to understand what the data say about proficiencies of candidates in relation to the P–12 ESL teacher education standards.

   - The report should compile the information in one place. This can be done with candidate cohorts or classes, or as aggregations of performance information. The report should discuss performance information across the ESL teacher education program for candidates, specifying whether the candidates represented in each piece of data are candidates enrolled, candidates completing, or former candidates who are
now employed as teachers. Also, the program report should pull together from the program’s multiple sources of data pertinent evidence across the scope of topics covered within each of the ESL program standards.

- The program report should also make sense of the data (e.g., explain what it means). The program report should state what the program faculty have learned and concluded about candidate proficiencies from the array of evidence assembled for each standard.

4. Include descriptions of rubrics or criteria and information resulting from use of rubrics

Descriptions of rubrics or criteria used to evaluate candidates’ proficiency levels should be included in the program report together with information on the proportion of the program enrollees and/or completers who have attained each level of performance defined by the program. It is not helpful for reviewers to see mean scores alone; reviewers need to see the proportion of candidates who have achieved at varying levels of proficiency.

5. Provide a few samples of candidate work

Samples of candidate work, as well as the candidate’s students’ work, should be included that illustrate:

- the 13 standards for ESL candidates, including specific reference to performance indicators as appropriate
- candidates’ work at different levels of performance as defined by the program (such as approaches, meets, or exceeds the standard)
- the variety of ways that standards are assessed in the program
- different stages during a candidate’s progress through the program

Each of these samples does not need to cover all of the 13 standards, but the composite of the samples should. The intent of the samples is to add depth to the summaries of candidate knowledge and performance by demonstrating the quality of candidate responses and by illustrating the multiple types of information that the program gathers about candidate performance. Good assessments often provide overlapping information that can inform several standards. Faculty should take advantage of that overlap in their summarizing of candidate performance and in their selection of samples of candidate work, to include in ESL program reports.

Several different assessments may well be needed to provide information demonstrating candidate performance in relation to a single standard—either because each assessment measures only part of a standard, or because a standard has several performance indicators that are most appropriately evaluated through differing forms of assessments. (See Number 6, below, which makes this point in terms of different attributes of standards.) Some performance indicators may be effectively measured through group projects, observations, responses to vignettes or case studies, lesson plans, microteaching, analysis of ESOL student work, interviews, or video analysis; others through such forms as pencil and paper tests, essays, or reflections.
6. Use multiple data sources

Summaries and interpretations of multiple data sources should illustrate various stages during the candidates’ preparation program; the scope of the 13 standards; and examples of dispositions, knowledge, and skills achieved by the candidates.

Each of the 13 standards for ESL teacher candidates has multiple performance indicators, each of which should be measured in appropriate ways. Not all performance indicators need to be addressed, but enough of them need to be addressed to show that the competencies in the standard have been met. The performance indicators are described on a 3-point scale:

- **Approaches Standard.** Candidate has knowledge about subject content, but does not yet adequately apply it to the classroom.
- **Meets Standard.** Candidates demonstrate the dispositions, knowledge, and skills to effectively teach ESOL learners. Candidates apply that knowledge within the classroom and other professional teaching situations.
- **Exceeds Standard.** Teacher candidates consistently display dispositions, knowledge, and skills associated with candidates who demonstrate positive effects on student learning and go on to successful teaching. It is expected that teacher candidates who exceed standards would be good candidates after the required 3 years of teaching for National Board for Professional Teacher Standards Certification under “English as a New Language.”

The points on this scale are additive. Meets Standard assumes that a candidate has also met the criteria under Approaches Standard; Exceeds Standards assumes that a candidate has also met the criteria under both Approaches Standard and Meets Standard.

One conclusion about the current state of the art in teacher assessment is that no single test or measurement of teacher candidates is sufficient by itself to represent these different attributes and the full scope of the standards. Multiple measures provide an array of opportunities for candidates to demonstrate their accomplishments in relation to the standards. Institutions are expected to draw on an extensive range of available assessment information, including observations, reflections, teaching demonstrations, analytic work, student work samples, traditional tests, and other forms of evaluative information demonstrating proficiency in teaching.

7. Make the report accessible for reviewers

Reviewers have limited time, and that time is not effectively spent in trying to find the evidence scattered through a report or provided as part of an undifferentiated set of examples of candidate work or assessment tasks. See tips for formatting/editing above under the question “What Are the Specific Requirements for Length, Organization, and format of the Program Report?”

**What Are the Characteristics of Performance Assessment?**

Performance assessment can be defined in several ways: as actual demonstrations that show learning has occurred, as outcome-based assessment, as task performances that reflect real-life situations, as a product or
performance that reflects program objectives, and so on. It is most useful when focusing on broad professional tasks rather than on a single sub-skill.

Assessments may include aggregated evaluations or random samplings of candidate and/or professor portfolios, rubrics of projects and investigations, candidate program evaluations, interviews, documented observations of simulations or clinical experiences, peer assessments, job performance of graduates, and so on.

Assessments are:

- essential to the task, not arbitrary or contrived
- enabling, constructed to point the candidate toward more sophisticated use of knowledge
- contextualized, complex, intellectual challenges, not isolated activities
- designed to emphasize depth of knowledge, not just breadth
- involved with broad tasks incorporating higher order thinking skills or problem solving

What Faculty Development Should Be Provided to Implement These Standards?

Although intending that the program report development process lead to continuous self-improvement, TESOL believes that each institution must decide for itself the best method for self-improvement. Developing a program report offers institutions an opportunity to learn about learning. The end product, therefore, must document that the faculty responsible for preparing ESOL teachers engages in self-reflection. This process offers institutions flexibility and accountability. The burden of proof for providing evidence that candidates are achieving the standards rests with the institution.

As part of this project, the institution should answer three fundamental questions:

1. What is it that our graduating candidates should know and be able to do?
2. How well are we doing in helping candidates get to where they need to be?
3. How can we do a better job?

Is Additional Guidance Available for Preparing a Program Report?

TESOL offers periodic program report preparation workshops. For further information on upcoming workshops or other guidance-related questions, contact Jason Majesky, TESOL program review coordinator, by telephone at 703-518-2527 or by e-mail at jmajesky@tesol.org, or check the TESOL Web site at http://www.tesol.org/. Click on “Standards & Initiatives” and follow the workshop links.

A list of programs found to be in compliance with these standards is routinely published by NCATE as part of its Annual Guide to Accredited Education Programs/Units, which can be found on NCATE’s Web site at http://www.ncate.org/. A list of programs can also be found on TESOL’s Web site at http://www.tesol.org/. In addition, a list of the programs that have gained “National Recognition” is regularly promoted on the Web sites of the following organizations: American Association of School Administrators (AASA) at http://www.aasa.org/, Association for Supervision and Curriculum Development (ASCD) at http://www.ascd.org/, National Association of Elementary School Principals (NAESP) at http://www.naesp.org/, and National
What Happens After a Program Report is Submitted?

After a program report has been submitted, it is analyzed by a team of TESOL reviewers. Reviewers are trained to judge the program(s) holistically, based on each of the 13 standards. Once the team’s report is written, TESOL reviews it and a decision is made whether to recommend accreditation or to grant “National Recognition” to the program(s). If a program is not in substantial compliance with each of the 13 standards, or if there is insufficient information to make a decision, TESOL may decide to “Deny” or “Defer” the program. Once a decision is made, the TESOL report is forwarded to NCATE. After the response from TESOL has been received, a copy is forwarded by NCATE to the NCATE coordinator at the institution. Institutions with a “Deferred” program action are expected to submit missing documentation for TESOL review.

Rejoinder Review Process

Should a program be “Denied,” the institution may be allowed to submit a rejoinder report to correct the weaknesses identified by the TESOL review. Approximately 2 months will be allowed for the institution to prepare a rejoinder report. A subsequent review by TESOL will occur in another 4–6 months. Although the preparation of a rejoinder report is optional and is not required by NCATE, the submission of a rejoinder is strongly encouraged. Should an institution decide to complete a rejoinder report, it is expected that the rejoinder and subsequent TESOL review will take place in advance of the scheduled NCATE accreditation visit so that the results will be available to the NCATE Board of Examiners (BOE) team for use in judging the evidence for NCATE Unit Standard 1: Candidate Knowledge, Skills, and Dispositions.

How Does the Program Review Process Fit Into NCATE Accreditation?

NCATE has program (content) standards in many areas. The program standards are developed by the national specialized professional associations, of which TESOL is one. Consistent with NCATE guidelines and the most important element of the program standards is their performance orientation. Results of program reviews conducted by the various professional organizations for each specialized program (e.g., educational leadership, reading education, special education) of an institution are used by NCATE to decide the accreditation status for the institution’s educator preparation unit under Candidate Performance, Unit Standard 1: Candidate Knowledge, Skills, and Dispositions. Under NCATE Candidate Performance, Unit Standard 2: Assessment System and Unit Evaluation, the unit must have an assessment system that collects and analyzes data on applicant qualifications, candidate and graduate performance, and unit operations to make decisions about its programs against NCATE’s unit standards. The unit must provide data about its candidates through multiple means of assessment throughout their preparation (NCATE 2000 Blueprint: A Status Report).

PROGRAM DESCRIPTION

1. Explain the knowledge and skill base, philosophy for preparation, and goals and objectives for each P–12 ESL teacher education program.

2. Describe the program of studies, indicating all required and elective courses for the P–12 ESL teacher education program.

3. Provide the number of credit hours per quarter or semester required for the P–12 ESL teacher education program and the type of degree or licensure.

4. Explain where the P–12 ESL teacher education program is located within the institutional unit and its interrelationship with other programs in the department or division, and in the university or program.

5. Describe how the department assesses its P–12 ESL teacher education program. Focus on collection, compilation, and analysis of candidate results that demonstrate candidate progress toward mastery of the TESOL/NCATE standards. Explain how individual results are compiled for program improvement purposes. Explain how multiple measures are examined over time to assess program effectiveness as demonstrated by candidate proficiency.

6. Describe relevant policies of the unit that affect the P–12 ESL teacher education program, including the relationship of the conceptual framework used for the unit accreditation to the TESOL/NCATE standards.

7. Describe any state requirements for candidates that may impinge on implementation of the program or on performance of the candidates, explaining how the program accommodates differences between the TESOL/NCATE standards and the state standards.
FACULTY QUALIFICATIONS

Provide information on the following indicators of quality for your faculty. You may include information on other indicators of your choosing. Please be as specific as possible.

1. Describe recent awards by individual faculty and/or the program or the department for outstanding professional contributions to the field.
2. Describe the type of support and training the department provides to all faculty members to prepare them to teach their classes.
3. Describe the process by which faculty is evaluated to ensure quality instruction and continuing program improvement.
4. Describe the scholarly productivity of faculty by documenting their contributions to ESL (e.g., teaching about, use of, and contribution to the knowledge base in ESL; publications; citations; external funds secured; editorships of journals).
5. Describe the work your faculty has done to assist schools, school districts, and state departments of education with educational improvement and reform.

Provide a faculty chart (see sample below) that lists each faculty member by program and includes the following information:

1. Names of faculty members and teaching staff in program
2. Percentage of time spent teaching within the department (e.g., full-time, part-time)
3. Professional rank and title
4. Course assignment(s)
5. Highest degree obtained and name of degree-granting institution
6. Status within the department (e.g., tenure-track, non-tenure, adjunct, and/or auxiliary)
7. Teaching and advising workload
8. Average class size
9. Number of years of previous or current work experience within the field of ESL
10. Participation and/or leadership in local, regional, and national professional associations

CANDIDATE QUALIFICATIONS

Please provide information on the following indicators of quality for your candidates. You may include information on other indicators of your choosing. Please be as specific as possible.

1. Describe and explain your admissions process and criteria used to evaluate potential candidates for the P–12 ESL teacher education program (e.g., entrance test, language assessment, years of teaching experience, experience with multicultural populations, cut-off scores, interviews, references).

2. Provide the acceptance rate of applicants into each program.

Provide a candidate chart (see sample below) that includes the following information:

1. Number of candidates enrolled (separated by cohort, if applicable) in the P–12 ESL teacher education program

2. Average admission score on standardized instruments or other admission assessments as required by the P–12 ESL teacher education program (separated by cohort, if applicable)

3. Average cumulative grade point average (GPA) and/or class rank required for admissions into the P–12 ESL teacher education program

4. Number of candidates who have graduated from the P–12 ESL teacher education program in the past 5 years

5. Number of graduates who have passed exams for state certification, designation, endorsement, and/or licensure, if applicable

6. Number of graduates in the past 3 years who have worked or are working as ESL teachers, administrators, or coordinators

COMPLIANCE WITH PROGRAM CRITERIA

The P–12 ESL teacher education program must meet the following program criteria. A brief summary statement should accompany each program criteria item below, citing evidence of how each item is met by the P–12 ESL teacher education program. For example, evidence for Criterion No. 5 might be stated as: “Candidates spend a minimum of x hours, observing and/or teaching an ESL class and subsequently write reflective journals on their classroom experiences.” The program coordinator or other administrator directly connected to the program must attest by signature that the ESL teacher education program is in compliance with the following items:

Program Criteria:

1. Curricula are designed in an integrated or problem-based mode to promote an understanding of the connectedness of the various knowledge and skill areas in language education.

2. Instructional emphasis is placed on those methods and materials that anticipate candidate performance in the field.

3. Appropriate adult learning strategies are used in the implementation of the ESL coursework.

4. The P–12 ESL teacher education program includes the acquisition of concepts, information, and skills, as well as the application and integration of these in the field.

5. The P–12 ESL teacher education program integrates field-based experiences in its program of study.

6. The P–12 ESL teacher education program integrates technology as a tool to enhance learning in its program of study.

7. Opportunities are provided for candidates to formulate and examine issues related to cultural conflicts, cultural identities values, discrimination, and racism.

8. A quality assurance performance assessment process is in place for candidate preparation, including (a) plans for, and use of, multiple measures to capture various candidate performance proficiencies called for in the standards; (b) plans and/or accomplishments under continuing efforts to assure credibility—accuracy, consistency, fairness, an avoidance of bias—of the assessment and evaluation system; and (c) plans for using, or regular use of, assessment results to evaluate and improve programs and teaching.

9. A self-evaluation process is in place that focuses on perceived program strengths and weaknesses as based on the TESOL/NCATE Standards for the Accreditation of Initial Programs in P–12 ESL Teacher Education.

Appendix A
TESOL’s Review of NCATE State Partnership Applications

State partnership applications and associated P–12 ESL teacher education program standards and specialty program review processes are examined by two members of the Program Approval Board. In the “state option” under NCATE 2000 State Partnership Program, states will provide information intended to show how their standards are aligned with those of the TESOL/NCATE Standards for the Accreditation of Initial Programs in P–12 ESL Teacher Education. Showing how state standards are aligned means that the state demonstrates that its own description of what teacher candidates should know and be able to do closely parallels the TESOL/NCATE standards. Alignment means comparability or similarity; it does not demand that state standards be identical to those of TESOL.

It makes no difference what the source of the teacher candidate knowledge and skill descriptions is, as long as it applies to state program approval processes. In some states, teacher candidate (or new teacher) knowledge and skill language is found in “program approval standards”; in others, it is found in “state licensure standards” or “teacher induction standards.”

Some states may not have language describing expected teacher candidate or beginning teacher knowledge and skill at all, but they may be moving in this direction over time. TESOL will weigh the following in determining a state’s eligibility in reviewing a partnership submission during a state’s transition period: The commitment, direction, and intention, in addition to the current status of the state’s standards.

TESOL requires the information described below for submission under the NCATE 2000 “state option” partnerships. States that have adopted the TESOL/NCATE standards will provide documentation at a prominent place in their submission. In those cases, the side-by-side “alignment” comparisons, described in No. 2 below, are not required.

1. Information on Contextual Background of State Standards

- identification of the specific program addressed and the Specialized Professional Associations’ standards with which it corresponds

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
• description of what the state does to ensure that educators are prepared to function effectively, including any testing requirements for internships and licensure in TESOL
• description of how the state standards were prepared, including background history, key participants, involvement of specialty organization experts, roles of various state agencies, and a summary of anticipated changes in the near future
• description of any unique state or local circumstances that TESOL should take into consideration when reviewing the state submission (which is especially important in instances where the law and other mitigating circumstances could affect the state’s ability to parallel the TESOL/NCATE standards or provide some of the information described above)

2. Information on Alignment of the State Standards With the Specialty Standards

• a matrix that facilitates direct comparison of state standards describing teacher candidate knowledge and skills with each TESOL/NCATE standard

Information that states are expected to provide for review of their teacher candidate standards by TESOL is different from the information that institutions provide for review. Intuitions summarize assessment results that demonstrate candidate proficiencies in relation to the standards. By contrast, the purpose of the state standards alignment submission is to show the comparability or similarity of state standards with the TESOL/NCATE standards.

3. Information on the State’s Program Approval Process

TESOL requires that the state follow the “Recommended practices for state program approval,” contained in Conditions and Procedures for State/NCATE Partnerships (see Appendix). Among the recommended practices is that copies of state program approval reports be provided to the TESOL program review coordinator. In addition, under the NCATE 2000 state option partnerships program, the state should submit the following information about its program approval processes and use of candidate performance information:

• a description of the state’s quality assurance systems for institutions and individuals participating in program approvals, including (a) selection, training, and evaluation of

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
reviewers; (b) monitoring of confidentiality and objectivity; (c) reviewing frequency of approval, disapproval, conditional approval, or deferment; and (d) procedures for resolving conflicts or redressing unfavorable actions

- the context for the state’s program approval process, including any law making and regulation by which standards are prepared and administered

States whose standards and/or review processes are not judged to be consistent with those of TESOL may submit a rejoinder containing further documentation and explanation. Follow-up consultation is offered to states wishing to revise their standards and/or review processes or to pursue the possibility of a joint review process with TESOL. TESOL is committed to assuring high-quality training in the profession and to working collaboratively with NCATE, state representatives, and others with an interest in assuring training consistent with national standards for teaching ESL.

TESOL accepts state program standards documentation on computer disk, via e-mail, or through NCATE’s Web site. TESOL will return the reviews to NCATE.
Appendix B

Recommended Practices for State Program Approval

Recommended Practices for State Program Approval (excerpted from Conditions and Procedures for State/NCATE Partnerships)

As part of NCATE’s effort to improve its Partnership program to serve the needs of state and NCATE’s constituent organizations, a task force of specialized professional association (SPA) representatives collaborated to define guiding principles for the process of program review.

For a consistent review process across all institutions and programs:

- A recognized state education agency or professional standards board should oversee and evaluate the review process.
- Written procedures should clarify the review process sufficiently to ensure a consistent application of standards in every review.
- The qualifications and training of those conducting reviews should be sufficiently specific to ensure consistency across reviewers.

For unbiased, objective decisions regarding program approval or nonapproval:

- Conflicts of interest should be avoided in reviews. Reviews should be conducted by a team that includes individuals with no present or past affiliation or bias toward the institution, and, whenever possible, individuals from other states should either conduct program reviews or have a significant role in reviewing program materials and in making decisions regarding program adherence to professional guidelines.

For reviews conducted by qualified persons, based upon a thorough understanding and application of relevant professional associations’ program standards:

- A relevant SPA should train those conducting program reviews.

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
- The appropriate SPA should periodically evaluate qualifications of reviewers to ascertain currency, accuracy, thoroughness, and fairness in interpreting and applying guidelines.

**For review decisions that are based on accurate information regarding program policies and procedures:**
- The review process should include a thorough study of written information, which addresses the relevant specialty guidelines.
- Reviewers should have sufficient time to study program information prior to any site visit.
- Site visits may be used to validate and further analyze written program information and determine more fully the consistency of program practices with specialty guidelines.
- Institutions should have the opportunity to issue a rejoinder to the review, clarifying or correcting information regarding program policies or practices.
- The final decision regarding program approval or nonapproval should take such information into account.

**For review decisions to be communicated clearly and to provide feedback useful for program development:**
- The review should culminate in a clearly written report that indicates the overall program decision (e.g., merits national recognition or not) and whether each of the SPA standards has been met or not. The report should also provide information regarding perceived program strengths and/or weaknesses.
- Comments should be specific enough to serve as the basis for program development.
- The report should be provided to the administrative unit/program in a timely manner.
- Copies of reports should be maintained by the organization, agency, or unit conducting the review and should be provided to the appropriate NCATE constituent SPA.

**NOTE:** Recommended Practices for State Program Approval is meant to provide suggestions offered by NCATE’s SPAs in meeting standards for program review. States are not limited by or restricted to these practices and are encouraged to contact NCATE’s SPAs for further suggestions.
Appendix C: TESOL’S PROCESS FOR REVIEWER TRAINING

Reviewer training prepares reviewers to make a holistic professional judgment about the overall program. TESOL will develop specific rubrics for the reviewers.

1. Specialty organizations develop procedures for quality assurance in the selection, training, and evaluation of individuals who will conduct program reviews as well as procedures to avoid conflicts of interest or bias in making assignments for review of programs in each institution. They will provide materials that may be requested by NCATE from time to time for use by SASB and its Process and Evaluation Committee to show how SASB guidelines for review procedures, quality, and feedback to institutions are being implemented and whether SPA actions are completed in a timely manner. Specialty organizations may also be asked to review and comment on analyses prepared by NCATE for use by the Process and Evaluation Committee.

A team of trained reviewers reviews the program reports prepared by the various institutions. The documentation is forwarded by NCATE to the TESOL program review coordinator. The documentation is then sent to three reviewers who independently evaluate each program. The reviewers do not know which other individuals are reviewing the same institutions. The program review coordinator does not review any program reports but serves to facilitate the review process. The review process takes approximately 3 weeks.

When the reviews are complete they are returned to the program review coordinator. If two or more reviewers agree in their evaluation of a folio, then that recommendation is sent to NCATE. When there is disagreement among the reviewers, the program review coordinator conducts a phone interview with the reviewers in an effort to reach consensus. If there still is disagreement among the three reviewers, the program review coordinator sends the program report to three new reviewers, and the process described above is repeated.

Once there is agreement between at least two reviewers, the program review coordinator compiles the three reviews into one report. This report and recommendation is then returned to NCATE for subsequent return to the submitting institution.

All reviewers participate in a training program. This training is held every year during the TESOL annual convention. The nature of this training includes simulation, direct lecture, role-playing, and review of TESOL/NCATE standards. Individuals volunteer to participate in the training. Following completion of the training, the volunteers are screened for final appointment.

The TESOL program review coordinator monitors the performance of reviewers. The TESOL Standards Committee provides oversight for the quality of the process.

TESOL also holds training sessions for institutions during its annual convention. Institutions that are preparing for accreditation are invited to send a representative to these sessions.

2. At least two trained reviewers must read and respond to each program evidence submission. (This information is located within section IV of this document, Guidance For Institutions: Instructions For Preparing The Program Report.)
TESOL trainers, administrators, professors, teachers, and practitioners who have acquired training and experience in the application of the TESOL ESL Standards for P–12 Teacher Education Programs evaluate program review materials.

Reviewers are selected on the basis of professional experience; ability to represent the needs of the profession; and potential ability and willingness to provide comprehensive, valid, timely reviews. Potential reviewers are nominated by the TESOL Standards Committee or by colleagues or supervisors. Self-nominations are also accepted.

Once selected, reviewers complete a “Reviewer Information Scan,” which requests information on past and present institutional affiliations. Reviewers undergo initial training in the interpretation and application of standards and periodic training updates. They are initially assigned to review teams consisting of at least two experienced reviewers who can provide guidance and mentoring. After achieving a level of competency reflected in high-quality review reports submitted to the Program Approval Board, reviewers are eligible to serve on two-person teams and as mentors to new reviewers.

The TESOL program review coordinator will evaluate the performance of reviewers, taking into account such factors as adherence to TESOL/NCATE procedures and schedules, thoroughness of reviews, and participation in annual reviewers’ meetings.

Two or three people with extensive background in the evaluation of programs examine each program independently. Prior to evaluating materials, each reviewer is asked to consider whether a potential conflict of interest might exist or be perceived to exist for any reason, including factors such as prior involvement with the institution, program, or personnel at that institution. A program reviewer is never assigned to review a program in a state in which that reviewer resides.

Reviewers evaluate the program’s compliance with each standard by examining the statements made by the program in submitted material(s), programmatic evidence (e.g., of program policy and practice), and evidence of candidate performance consistent with the standards.

Reviewers evaluate each standard using the following ratings:

A = Approaches Standard, meaning that the documentation provided and the evidence submitted clearly establish that the teacher candidate has knowledge about the subject content but does not yet adequately apply it to the classroom.

M = Meets Standard, meaning that the documentation provided and the evidence submitted clearly establish that the teacher candidate demonstrates the dispositions, knowledge, and skills to effectively teach ESOL learners. Candidates apply that knowledge within the classroom and other professional teaching situations.

E = Exceeds Standard, meaning that the documentation provided and the evidence submitted clearly establish that the teacher candidate consistently demonstrates the dispositions, knowledge, and skills associated with candidates who demonstrate positive effects on student learning and go on to successful teaching. It is expected that teacher candidates who exceed
standards would be good candidates after the required 3 years of teaching for National Board for Professional Teacher Standards Certification under “English as a New Language.”

Appendix D: TESOL’S Feedback from the Field

Feedback and Decisions

Most of the respondents expressed their satisfaction with the first draft of the document and made no recommendations for major changes. Suggestions that provided clarity or inclusiveness were incorporated into the document. The chart below reflects pertinent key elements of survey respondents’ feedback and action taken by the task force.

**Feedback on First Draft**

<table>
<thead>
<tr>
<th>Survey Section</th>
<th>Respondents’ Comments/Suggestions</th>
<th>Task Force Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front Matter</td>
<td>Encourage more diversity in the ESOL teaching field.</td>
<td>Addressed</td>
</tr>
<tr>
<td></td>
<td>Cover elementary as well as secondary level.</td>
<td>Addressed</td>
</tr>
<tr>
<td>Document in general</td>
<td>Make “Approaches Standard” column more positive.</td>
<td>Addressed</td>
</tr>
<tr>
<td></td>
<td>Review columns. “Meets Standard” is sometimes too high for new teachers.</td>
<td>Addressed</td>
</tr>
<tr>
<td></td>
<td>Substitute for the word “understand” in “Approaches Standard.” This evokes in-depth knowledge, the ability to analyze. Perhaps “be familiar with” or “know.”</td>
<td>Incorporated</td>
</tr>
<tr>
<td></td>
<td>Overwhelmed. As PhD in the field, I don’t meet all of these standards. Streamline.</td>
<td>Addressed</td>
</tr>
<tr>
<td></td>
<td>Use not only “elements” but “elements and processes.”</td>
<td>Incorporated</td>
</tr>
<tr>
<td></td>
<td>Address issue of adding courses to an already full load for candidates.</td>
<td>Not relevant</td>
</tr>
<tr>
<td></td>
<td>Address the fact that candidates’ instructors need room to be creative and time to fit in their own priorities.</td>
<td>Not relevant</td>
</tr>
<tr>
<td></td>
<td>Address recruitment of minority candidates to the TE [teacher education] program.</td>
<td>Incorporated</td>
</tr>
<tr>

Appendix E: GLOSSARY OF TERMS

academic language: language used in the learning of academic subject matter in a formal schooling context; aspects of language strongly associated with literacy and academic achievement, including specific academic terms or technical language, and speech registers related to each field of study

accommodation (verb: accommodate): procedure often given to ESOL students during English-medium standardized or high-stakes testing experiences that enables them to demonstrate knowledge of content regardless of their English proficiency (e.g., test translations, permission to use bilingual dictionaries)

achievement test: test that reflects a student’s progress and learning of materials presented in a specific course, often referring to specific course objectives and often based on detailed course syllabus and/or course materials

acquisition (verb: acquire): the process of developing competency in a language

affective variables: the emotional variables that affect language acquisition (e.g., motivation, self-esteem, attitudes, anxiety)

alternative measures of assessment: criterion-referenced method of assessment that is alternative to traditional forms of testing, often referring to nonquantifiable results, often controlled by classroom participants other than the teacher or test proctor

authentic measures: various kinds of assessment reflecting student learning of, progress on, and attitudes toward relevant coursework (e.g., performance assessment, portfolios, peer assessment, self-assessment)

bias: content material reflects cultural and/or linguistic information unfamiliar to ESOL learners (see also cultural bias, linguistic bias)

behaviorist: stimulus response reward, habit formation theory of learning

benchmark: description that demonstrates progress and/or proficiency in a particular skill

bubble sheets: format of testing often given to students in multiple-choice, standardized, high-stakes, or norm-referenced procedures; student must use pencil to fill in numbered or lettered circles corresponding to a list of possible answers listed on a separate test paper or booklet

code-switching: a change by a speaker or writer from one language or variety of language to another at the word, phrase, clause, or sentence level

cognate: a word in one language that is similar in form and meaning to a word in another language because the two languages are related

cognitive variables: developmental factors (e.g., age, developmental maturity, learner styles, learner strategies) that enable students to think, solve problems, and acquire information

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
collaborative teaching: models of instruction involving more than one teacher, including team teaching, parallel teaching, and station teaching

colocation: the clustering and restrictions on clustering of words in combination

communicative competence: the ability to recognize and produce authentic and appropriate language correctly and fluently in any situation; use of language in realistic, everyday settings; involves grammatical competence, sociolinguistic competence, discourse competence, and strategic competence

comprehensible input: a construct developed to describe understandable and meaningful language directed at L2 learners under optimal conditions; characterized as the language the learner already knows plus a range of new language that is made comprehensible by the use of certain planned strategies

criterion-referenced: assessment designed to measure a student’s particular ability to work with a specific skill or piece of knowledge; focus on the assessment is exclusively on the student (see norm referenced)
cultural bias: images or references that come from the target culture/L2 culture and are unfamiliar to ESOL learners (see bias; linguistic bias)
cultural identity: the characteristics at the intersection of language and culture that constitute the makeup of an individual
cultural relativism: the notion that language is reflective of a given culture; the interdependence of culture and language
cultural universalism: the notion that similar patterns or characteristics exist across cultures
diagnostic: assessment measure used to indicate a student’s potential and future performance
dialect: a regional or social variety of language distinguished by features of vocabulary, grammar, pronunciation, and discourse that differ from other varieties

exiting: determination that an ESOL student is ready to advance to a content-area instruction in English along with native speakers (see reclassification)

grapheme: the smallest unit in a writing system (e.g., a letter, number, or symbol)

high-stakes testing: standardized test used to reflect how well schools are doing in content areas and/or to help determine graduation qualification for the students who take it

LFS: limited formal schooling

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
**language minority students**: students who speak a language other than or in addition to English at home

**language varieties**: variations of a language used by particular groups of people that includes regional dialects characterized by distinct vocabularies, speech patterns, grammatical features, and so forth; may also vary by social group (sociolect) or idiosyncratically for a particular individual (idiolect)

**learning styles**: preferences for processing information, often culturally based

**linguistic bias**: items overtly or implicitly favoring speakers of standard dialects

**monitor** (verb): to oversee; check and adjust when necessary; a higher level of language acquisition when the learner recognizes and can correct grammatical, lexical, or pronunciation errors

**motivation**: the inner drive that pushes an individual to accomplish something; Gardner and Lambert (*Attitudes and Motivation in Second Language Learning*. [1972]. Rowley, MA: Newbury House) distinguish between instrumental motivation (an external or specific purpose for learning, e.g., a business trip) and integrative motivation (the desire to become a part of a community)

**multiple choice**: kind of assessment in which a student reads a question and selects a correct answer from a set of several choices; common question format used in standardized and high-stakes examinations (see bubble sheets)

**native language assessment**: an instrument designed to provide information on the level of proficiency (preferably across all four skill areas: listening, speaking, reading, and writing) an individual possesses in his/her native, or first, language

**nonverbal communication**: paralinguistic and nonlinguistic messages that can be transmitted in conjunction with language or without the aid of language; paralinguistic mechanisms include gestures, facial expressions, and body language, among others

**norm-referenced**: type of assessment in which a student’s result is related to that of other students who take the same test, often presented as a number indicating the percent of students who also took the assessment that performed better or worse than that student (see criterion-referenced)

**orthography**: the spelling system

**peer assessment**: performance measure in which control of a student’s evaluation is handled by other students in the course; control is often outside the purview of the teacher

**phoneme**: the smallest unit of sound that distinguishes meaning in words

**phonemic awareness**: the ability to perceive and manipulate the sounds (phonemes) that make up words in oral language

© 2002 by Teachers of English to Speakers of Other Languages, Inc. (TESOL).
placement: assessment to determine the proficiency level of a student, usually leading to determination of which class that student would most comfortably work in

portfolio: a compilation of selections of a student’s work that reflects progress over time, typically conducted as part of class activities or homework, reflecting characteristics of performance assessment

primary language: first or native language spoken by an individual

realia: actual objects and items that are brought into a classroom as examples or aids in speaking or writing practice in language teaching (e.g., photographs, articles of clothing, household items)

reclassification: determination that an ESOL student is ready to advance to a higher level of English language instruction (see exiting)

reliability: a technical measure to determine an assessment’s ability to produce consistent, accurate results

scaffolding: the provision of temporary support (often linguistic) by a more proficient person for learners not able to perform unassisted

social constructivism: learning theory that claims learners actively construct their own understandings within a social context (contrast with transmission theory of learning)

social language: the aspect of language proficiency strongly associated with basic fluency in face-to-face interaction; natural speech in social interactions, including those that occur in a classroom

sociocultural competence: ability to function effectively in a particular social or cultural context according to the rules or expectations of behavior held by members of that social or cultural group

sociocultural variables: factors associated with the social and cultural community (e.g., language and ethnic status, value systems)

sociolinguistic competence: related to communicative competence; the extent to which language is appropriately understood and used in a given situation (e.g., the ability to make apologies, give compliments, and politely refuse requests)

standardized achievement tests: measures developed commercially or at the district or state level, intended to determine how schools are performing in content areas (see high-stakes testing)

standards-based assessment: the systematic planning, gathering, analyzing, and reporting of student performance according to established standards, such as the ESL standards
**text-rich environment**: a classroom or other learning center where a large variety of print is available that represents a wide variety of English proficiency levels and age-appropriate content; texts may also be in the L1 of the students

**traditional measures of assessment**: types of tests used when many students are being tested simultaneously, often norm-referenced, multiple choice, standardized

**validity**: a technical measure of an assessment’s match between the information collected by the items and its specified purposes
